A More Inclusive Internet: The New gTLD Applicant Support Program

**Bringing Opportunity to Communities,
Organizations, and Regions Around the
World**

Webinar | 26 September 2024

Agenda

01 Welcome

02 Overview of the
New gTLD Program:
Next Round

03

Availability of Assistance
through the Applicant
Support Program

04

ICANN's Outreach and
Engagement Approach

01

Welcome

The New gTLD Program

The **New Generic Top-Level Domains (gTLD) Program** is a community-driven initiative to enable the continued expansion of the Domain Name System.

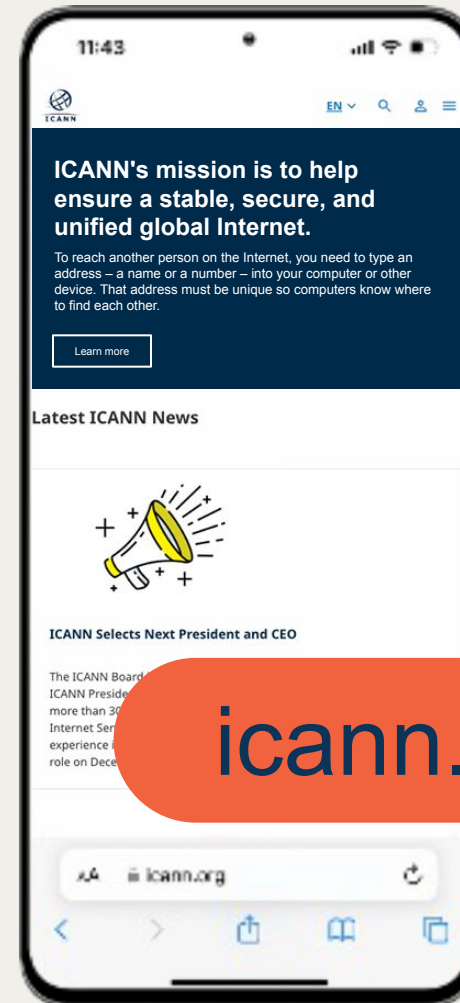

Beginning in 2026, businesses, communities, governments, and other organizations can apply for new gTLDs tailored to fit their needs.

What is a gTLD?

Top-level domains form the last part of a domain name, appearing after the dot. For example, in the domain name **icann.org**, the characters 'org' identify the TLD.

Through the 2012 New gTLD Program, more than 1,200 new unique names like **.trade** and **.vegas** were added to the Internet.

02

Overview of the New gTLD Program: Next Round

A Successful Next Round

Foster diversity.
Encourage competition.
Enhance the utility of the DNS.

Goals for the New gTLD Program: Next Round

1

Applications that include new communities and voices, a variety of languages and scripts, geographic and ethnic diversity, entrepreneurs and startups, and non-profit organizations.

2

A higher proportion of applications submitted by entities outside of North America and Europe than were received in the 2012 Round.

gTLD Opportunities

Connect and serve new groups:

Businesses and brands

Communities and cultures

Geographies
(e.g., cities and regions)

Governments – local and national - and IGOs

Targeted customers or members

Users of diverse scripts

New Domain Names, New Uses

▶ Serve diverse cultural, geographic, language, and professional communities.

▶ Provide communities and organizations opportunity to create their own space online.

▶ Build trust in and awareness of a brand.

▶ Manage and secure your online presence.

EXAMPLES:

Industry-specific:

.photography

.rugby

.bank

Creative tools:

playlist.new

doc.new

Location-based:

.durban

.nyc

Script-based:

.网址

.شبكة

Brands:

.google

.apple

Online identity:

.blog

Benefits of Operating a gTLD

Becoming a Registry Operator

Applying for a gTLD means you are applying to operate a piece of the Internet (a registry).

A registry supports all the domains registered under a particular gTLD.

A Registry Operator:

- ▶ Sets the requirements for the gTLD.
- ▶ Determines which second-level domains (the characters to the left of the dot) can be registered, and by whom.

Financial and Technical Considerations

New gTLD Program: Next Round evaluation fees: **US\$227,000**

- + Standard operational fees included in the Registry Agreement signed with ICANN
- + Ongoing financial and technical obligations

Applying for a new gTLD requires significant financial and technical resources.

All new gTLD applicants must be able to demonstrate the operational, technical, and financial capacities necessary to operate a registry and comply with contractual requirements.

Responsibilities of Registry Operators

Registry operators:

- Maintain master database of all domain names registered in the TLD.
- Generate the "zone file" that allows computers to route Internet traffic to and from TLDs anywhere in the world.

Responsibilities include:

- Manage requirements detailed in the Registry Agreement and ICANN policies.
- Convert domain names into IP addresses to enable routing of Internet traffic.
- Operate the technical aspects of the TLD.

03

Availability of Assistance through the Applicant Support Program

Criteria for Applicant Support

To be eligible for assistance through the Applicant Support Program, applicants must demonstrate:

- ✓ General business due diligence
- ✓ Public responsibility due diligence
- ✓ Financial need
- ✓ Financial viability
- ✓ Eligible entity status

Applicant Support Program

Applying for a gTLD is expensive and may be out of reach for many. The Applicant Support Program makes applying for a new gTLD more accessible to entities that are unable to because of financial and other resource constraints.

Candidates must be one of these types of entities:

Nonprofit,
nongovernmental,
and charitable
organizations

Intergovernmental
organizations

Indigenous/tribal
peoples'
organizations

Micro and small
businesses that
are social
enterprises or
that operate in a
less-developed
economy

Applicant Support Portfolio

The Applicant Support Program provides a range of financial and nonfinancial assistance to qualified, eligible entities.

Financial Support

- ▶ A 75-85% reduction in applicable gTLD evaluation fees
- ▶ Bid credit
- ▶ Reduced/waived base registry operator fees

Nonfinancial Support

- ▶ Training materials: applying for a gTLD, becoming a Registry Operator
- ▶ Capacity Development/ Mentorship Program
- ▶ Access to an Applicant Counselor
- ▶ List of volunteer professional service providers

Evaluating Support Applicants

PHASE 1

General business due diligence, including:

- ▶ Legal compliance check.
- ▶ Confirming that all required documentation has been submitted.
- ▶ Confirming the applicant meets eligibility criteria for New gTLD Program: Next Round.
- ▶ Background screening and cybersquatting history check.

Applicants that do not pass the general business due-diligence pre-screening will not be considered for Phase 2 evaluation.

Evaluating Support Applicants

PHASE 2

Evaluations conducted by third-party vendor managing a Support Applicant Review Panel:

▶ Public responsibility due diligence:

- Applicant does not trade in, produce, or promote an industry/string contrary to generally accepted legal norms of morality and public order.
- Applicant is not affiliated.

▶ Financial need:

- Applicant could not afford to apply to the New gTLD Program without financial hardship.

▶ Financial viability:

- Applicant demonstrates plan to cover remaining discounted portion of the base gTLD application fee and submits required deposit.

An approved entity that passes both phases may qualify for support.

What Happens Next?

1

All new gTLD applicants – supported or not – are required to submit a completed application for a new gTLD.

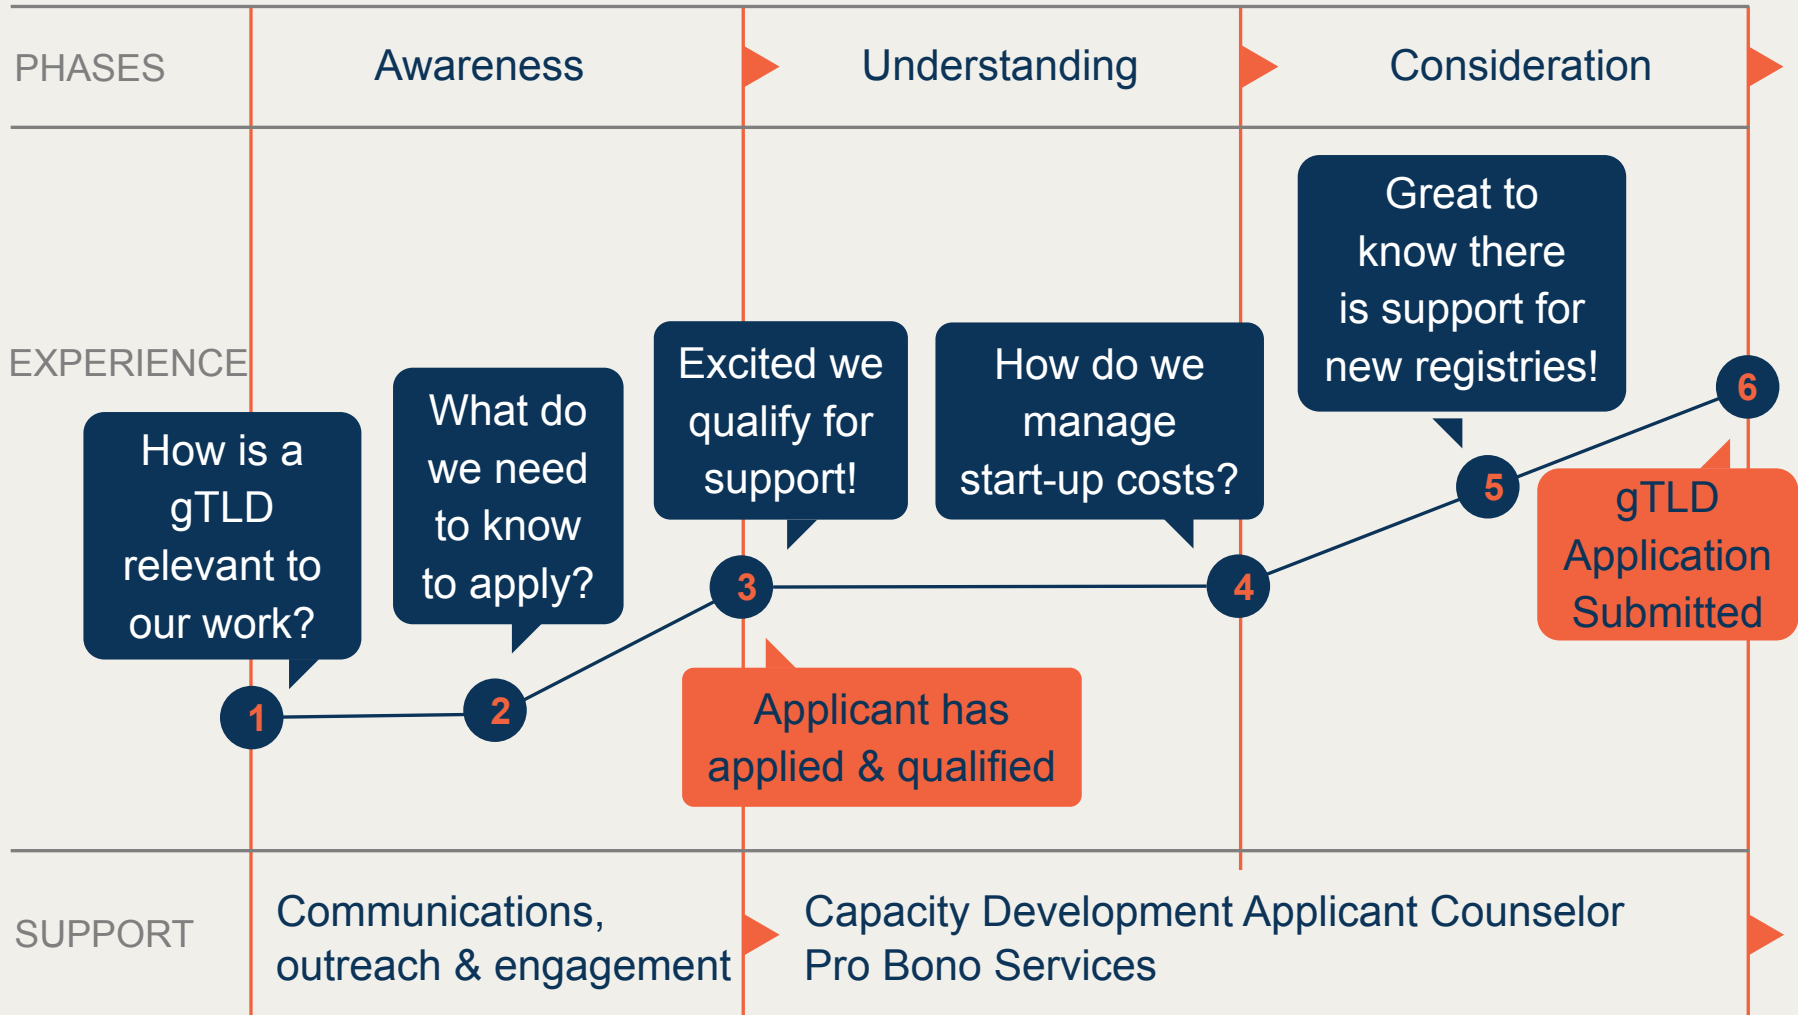

2

Requires demonstration of technical, operational, and financial capabilities needed to operate a gTLD.

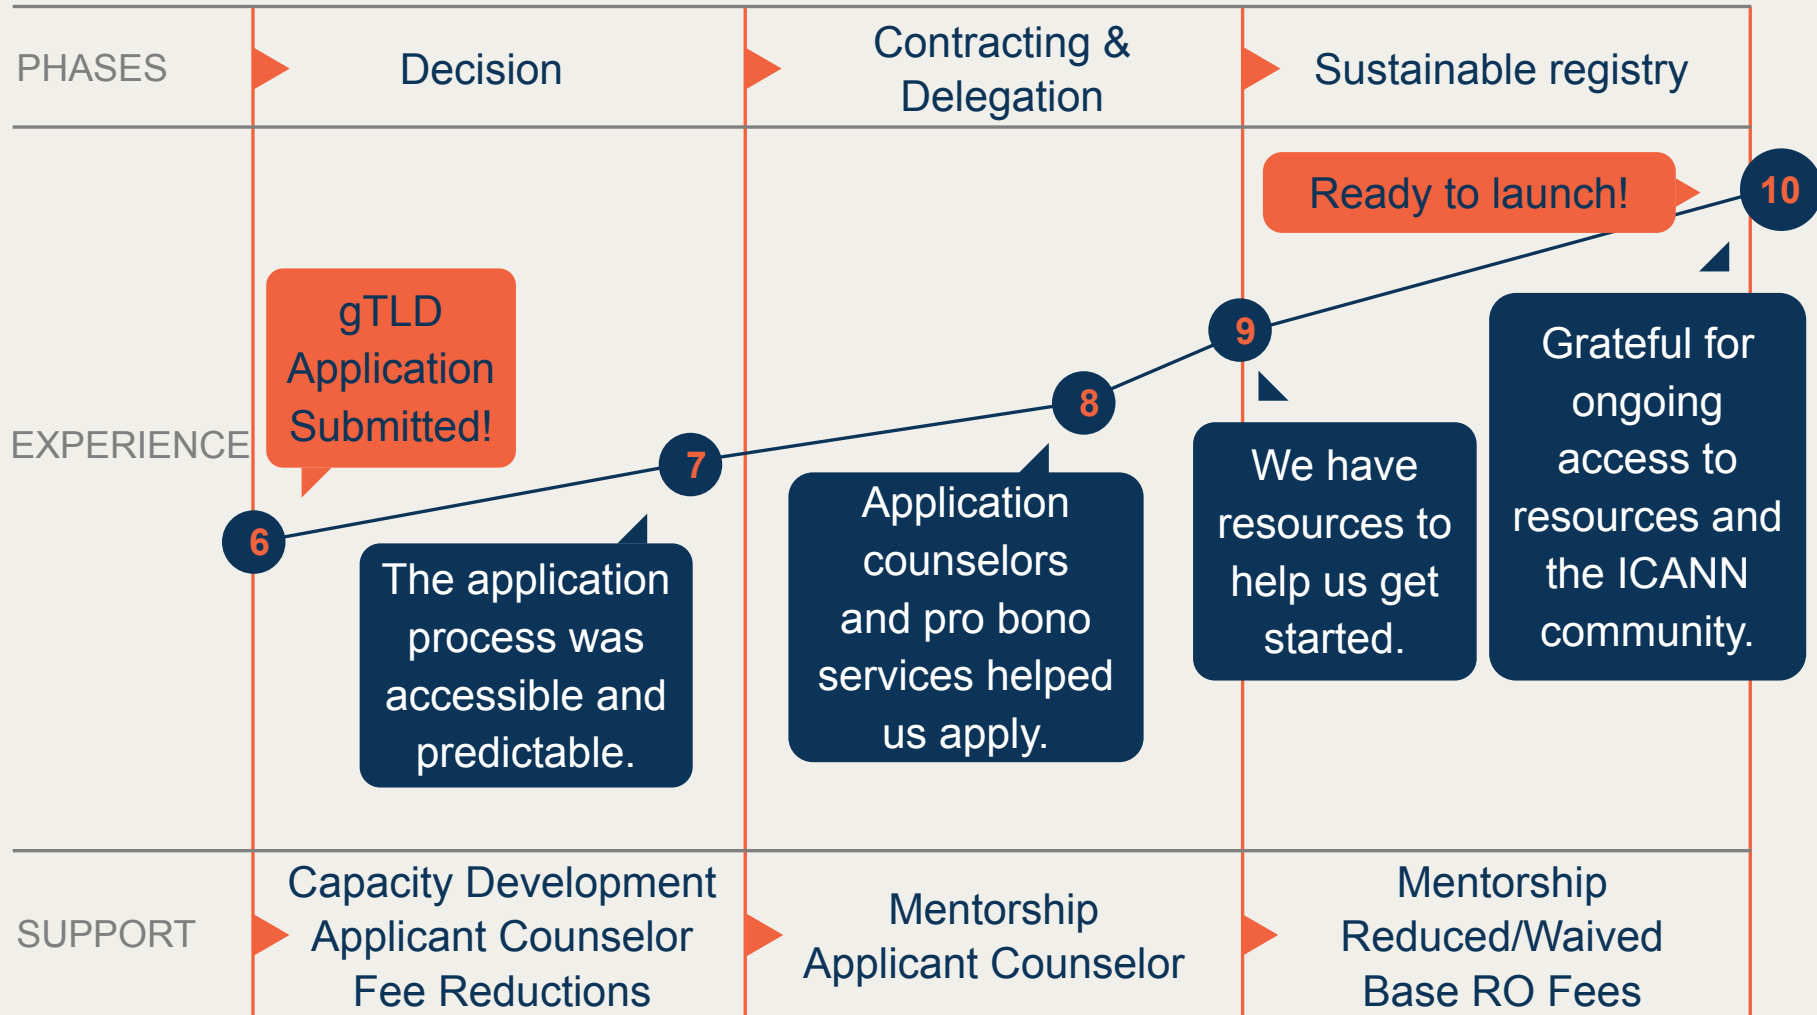

3

There are also measures in place to deter abuse of the program, outlined in the Applicant Support Program Handbook.

A Supported Applicant's Journey

ICANN's Outreach and Engagement

Engagement and Outreach

Identify **target markets**, producing regional and country plans.

Identify Applicant Support Program-**eligible entities**.

Seek **conduits** and **introductions** to **new contacts** and audiences.

Consult with local **ICANN community members**.

Provide **toolkits and materials** for events, webinars, bilateral meetings, and prospecting calls.

Conduct accompanying **media and communications** campaigns.

An Invitation to Collaborate

Capacity development, communications, and outreach with a focus on global inclusivity are key to fostering diverse participation in the next round of new gTLDs.

Outreach and engagement efforts will leverage existing relationships, the personal networks and connections of ICANN teams, and the broader ICANN community across the regions.

Your Role In Building A More Inclusive Internet

1

Assist in identifying and mentoring potential applicants, including in countries and territories where there may not be an established domain name industry that can support a new registry.

2

Connect established domain name sector players with new entrants.

- ▶ Note the availability of evaluated Registry Service Providers for new gTLDs.

Become a Next Round gTLD Program Champion

Convene and communicate in your own networks

Fully self-directed and voluntary

Utilize materials and resources developed by ICANN

Self-service Champions Toolkit to be published on newgtldprogram.icann.org under “resources”.

Toolkit (in six languages) to include:

- ▶ Flyers
- ▶ Presentations
- ▶ Sample Event Agendas
- ▶ Options for available remote speakers

Milestones

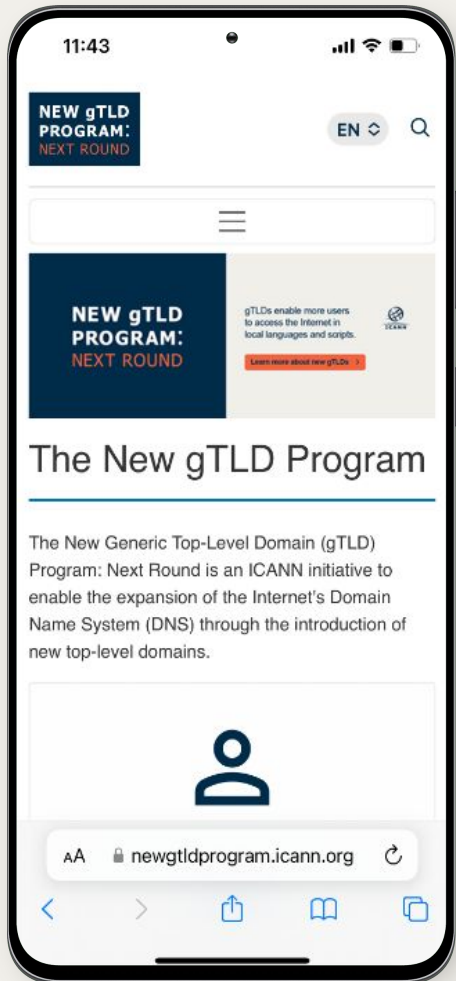

Recent:

- ASP Webinars
- Champions Toolkit published
- Africa Internet Summit
- Asia Pacific Telecom Forum
- London Domain Summit

Upcoming:

- RSP Webinars
- Blog Post on Final Evaluation Fees
- Country-based media campaigns
- “Applicant Readiness” build-out
- Prep Week ICANN 81

- The ICANN Engagement Calendar is updated regularly <https://www.icann.org/en/engagement-calendar>
